遺跡の概要/ Summary of Site

I 所在市町村名

青森県七戸町

保護指定の種別・指定年1998年 史跡指定

Ⅲ 保護指定の面積

35,551.00m²

Ⅳ 遺跡の概要

東北地方太平洋岸、小川原湖西岸に形成された前期から中期にかけての大規模な貝塚を伴う集落遺跡です。貝塚は東西に2か所形成され、竪穴建物、貯蔵穴、墓も配置されています。この時期の貝塚として東北地方有数の規模を誇り、環境や生業、集落構造を考える上で重要です。

I Location

Shichinohe Town, Aomori Prefecture

Type and year of designation for protection
Designated as a historic site in 1998

Area designated for protection 35.551.00 m

N About the site

This site is a settlement with a large shell midden from the Early to the Middle Jomon period. It is located on the west bank of Lake Ogawara in the northeastern region of Japan on the Pacific coast, Two shell midden were constructed: the east and the west area. Pit dwellings, storage holes, and graves were also arranged around them. Because it is one of the largest middens in the Tohoku region of Initial Jomon, it is valuable to study the environment, subsistence, and structure of the settlement at that period.

一万年前、長い氷河期が終わりを迎え、地球は次第に温暖になり、極地や大陸の氷が解け始め、海水面が徐々に上昇してきました。日本列島の内陸まで海水が押し寄せた縄文海進では、縄文時代前期にはピークに達し、現在の気候より2度、海水面は5~6mも上昇していたといいます。

こうした自然環境の変化は遠浅の海岸をつくり、様々な 魚介類を生息させ、針葉樹林の大地を落葉広葉樹林に変え、 動植物の住みよい森が出来ました。

As far back as 10,000 years ago, the long Glacial Age came to an end, it became progressively warmer in the earth. The ice at the Poles and the continents started to melt, and the sea level gradually rose. The Jomon Transgression, which caused sea water to move to inland of the Japanese archipelago and water levels peaked in the early Jomon period. At that time the temperature was two degrees higher than the present, and the sea level was five to six meters higher than the present.

These changes in the natural environment brought shoaling beaches inhabited by various marine species, while on the land they turned conifer forests into broadleaved forests, which are good environments for many kinds of plants and animals.

A cultural sphere composed of Hokkaido and the northern Tohoku region is a treasure house of the Jomon archaeological sites, including the Sannai-Maruyama Site, one of the largest settlements of the Jomon period in japan. We, Hokkaido, Aomori, Iwate, Akita prefectures and related municipalities evaluate these Jomon archaeological sites as the valuable cultural heritages to be conserved for the future generations not only of Japan, but of the world. The four prefectures are working together to have these sited registered as World Heritage sites.

縄文文化 The Jomon Culture

縄文文化は、紀元前約1万3千年に始まり、世界的にも 稀な生物多様性に恵まれた生態系に適応し、自然との共生 のもと、約1万年間にわたる持続可能な社会を形成した日 本列島特有の先史文化です。本格的な農耕と牧畜を選択す ることなく、狩猟・採集・漁労を生業の基盤としながら定 住を達成し、協調的な社会を作り上げ、それを長期間継続 できた縄文文化は、世界の他地域における新石器時代の文 化とは全く異なり、先史文化としては世界史上極めて稀有 なものです。

Jomon culture, which began in 13,000 BC and continued for about 10,000 years, is a well-known prehistoric culture

peculiar to the Japanese archipelago. It formed a long-lasting, sustainable society by adapting to the ecosystem which is uncommonly rich in biodiversity and coexisting with nature. Without implementing the full-scale agriculture and pastoralism, Jomon culture accomplished and continued a sedentary and corporative society for long periods based on hunting, gathering and fishing as main subsistence. Therefore, being different from neolithic cultures in rest of the world, Jomon culture is an extraordinarily rare prehistoric culture in the world history.

北海道・北東北の縄文遺跡群を 世界遺産に!

Our goal is to make Jomon Archaeological Sites in Hokkaido and Northern Tohoku as World Heritage Sites!

「北海道・北東北を中心と した縄文遺跡群」は、その価 値が認められ、2009年1月 5日、世界遺産候補として世 界遺産暫定一覧表に記載され ました。

そして現在、世界遺産登録への実現に向けた取組を進め ています。

The value of the "Jomon Archaeological Sites in Hokkaido, Northern Tohoku, and other regions" has been recognized, and on January 5th, 2009 the group of sites was recorded on the World Heritage tentative list as a World Heritage candidate. Moving forward, we will further our efforts to achieve World Heritage registration.

縄文遺跡群ロゴマーク

Logo of Jomon Archaeological Sites

全体を縄文土器に見立て、 北海道と北東北の形を、縄文 時代のパワーを象徴するよう な渦巻きの形で繋いでいます。 図形の色は縄文時代の漆器や 土器にみられる赤漆色とし、 構成資産の範囲を濃い目の色 のグラデーションで表現して います。

デザインの左右に「縄文」の文字を、下部に「JOMON JAPAN」の文字を配置しました。「JAPAN」には「漆」の 意味もあります。

The whole shape represents Jomon pottery and the shape of Hokkaido and northern Tohoku connected by a spiral which symbolizes the power of Jomon.

It is painted in red-lacquered color, which can be seen in pottery and lacquered objects of Jomon period. The gradation of darker red represents the geographical range of nominated properties.

You can see 'Jomon' in Kanji character in Japanese at the both sides of design, and 'JOMON JAPAN' at the base. JAPAN also means lacquer.

It is a group of communal cemeteries constructed in the late phase of Late Jomon. Bodies were buried in grave pits arranged in the inside section of circular earthworks. Eight circular earthworks are visible on the surface in the registered area of historic site. Diameter of the largest one is 75 meters, and its vertical interval between the inside section and the embankment is 5 meters. It is the one of the biggest monument in Jomon period.

- Aomori City, Aomori Prefecture
- Designated as a special historic site in 2000
- 243,340.11m²
- This site comprises a large-scale settlement which lasted for a long period of time from the Early to Middle Jomon. It has an extremely high academic value in the comprehensive studies of Jomon culture. This site represents the Jomon archaeological sites of Japan, giving a great influence on the perception of the Jomon period throughout the entire Japanese archipelago.
- V Cultural Properties Protection Division, Aomori Prefectural Government TEL: +81-17-781-6078

Komakino Site

- 青森県青森市 Π
- П 1995年 史跡指定
- 87,632.61m²

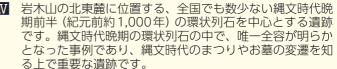

V 青森市教育委員会文化財課 (TEL: 017-761-4796)

- I Aomori City, Aomori Prefecture
- II Designated as a historic site in 1995
- 87,632.61m
- This site mainly comprises a large stone circle constructed in the first half of the Late Jomon period, special because of the filling of land and the unique arrangement of stones. It is valuable not only for understanding the spiritual customs, social structure and burial practices in those days, but also in the study of engineering techniques used in such opérations as land filling and the transport and placing of numerous large stones.
- V Cultural Assets Section, Aomori City Board of Education TEL: +81-17-761-4796

Omori-Katsuyama Site

- 青森県弘前市
- 2012年 史跡指定
- 85.154.83m²

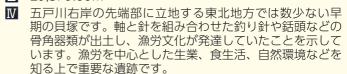

弘前市教育委員会文化財課 (TEL: 0172-82-1642)

- Hirosaki City, Aomori Prefecture
- Designated as a special historic site in 2012
- 85.154.83m²
- Omori-Katsuyama site is located at the northeastern foot of Mt. Iwaki. This is one of the few stone circles dated to early phase of Final Jomon (about 1,000 BC) in this site. Among the stone circles of Final Jomon in Japan, this site is only one example on which the whole picture was clarified. It is valuable site to consider the ceremonial and burial practice in the Jomon period.
- V Cultural Assets Section, Hirosaki Municipal Board of Education TEL: +81-17-282-1642

7谷地貝塚

Choshichiyachi Shell Midden

- 青森県八戸市
- 1981年 史跡指定
- 29,579.00m²

八戸市埋蔵文化財センター是川縄文館 (TEL:0178-38-9511)

- Hachinohe City, Aomori
- Designated as a historic site in 1981
- Ш 29,579.00m²
 - The choshichiyachi shell midden is located at the tip of the right bank of the Gonohe Gawa River, this site comprises a shell midden. A shell midden in such an initial Jomon period is rarely seen in the Tohoku region (the northeastern part of the mainland of Japan). Bone and antler implements, such as fish hooks combined stem and hook, and open socketed harpoon heads were unearthed. These Implements shows the development of a fishing culture. It is a valuable site for learning about the livelihood based on fishery as well as the eating habits and natural environment in those days.
 - Korekawa Archaeological Institution (TEL: +81-17-838-9511)

これかわ 是川石器時代遺跡

田小屋野貝塚

Tagoyano Shell Midden

青森県つがる市

П 1944年 史跡指定

20,076.84m

岩木川左岸に立地する日本海側では数少ない前期の貝塚 を伴う集落遺跡で、クジラなど大型哺乳類の骨で作った骨 角器や人骨が発見されました。ベンケイガイの貝輪が多数 出土したことから、貝輪の製作が行われていたことが明ら かになり、環境や生業、生産活動を知る上で重要です。

つがる市教育委員会社会教育文化課 (TEL:0173-49-1194)

Tsugaru City, Aomori Prefecture

Designated as a historic site in 1944

Ш 20.076.84m

This is a settlement site located on the left bank of the Iwaki River includes a shell midden of the Early Jomon period. Middens are hardly to be found on the coast of Japan sea. Bone implements made from large mammals such as whales and human bone were discovered from this site. Numerous bracelets made of Benkeigai (Giycymeris albolineatus) indicate the production of shell bracelets at the site. This site is significant to study the environment, subsistence and the production activities in Jomon period.

Department of Social Education and Culture, Tsugaru City Board of Education (TEL: +81-17-349-1194)

かめがおか ③亀ヶ岡石器時代遺跡

Kamegaoka Site

青森県つがる市

1944年 史跡指定

38.887.99m²

岩木川左岸に立地する晩期の代表的な遺跡です。江戸時代 から優れた土器が多数出土することで知られ、「亀ヶ岡文 化」の名称の由来になりました。亀山、沢根及び近江野沢 の3地区からなり、土坑墓群、漆塗り製品、ヒスイ製品の 玉類や、大型の遮光器土偶などが発見されました。

つがる市教育委員会社会教育文化課(TEL:0173-49-1194)

Tsugaru City, Aomori Prefecture

Designated as a historic site in 1944

38,887.99m

This is a representative site of the Final Jomon period located on the left bank of the Iwaki River. It had been known since the Edo period for the discovery numerous Jomon pottery. So the term Kamegaoka Culture came from its place name which means "a hill of pottery". It consists of three areas: Kameyama, Sawane and Ominosawa. Group of graves, lacquerware, jade jewelry, and a large snow goggle-eyed clay figure have been discovered from the site.

Department of Social Education and Culture, Tsugaru City Board of Education (TEL: +81-17-349-1194)

Odai-Yamamoto Site

青森県外ヶ浜町

2013年 史跡指定

20,377.87m²

蟹田川左岸に立地する草創期の遺跡です。旧石器時代の特 徴を持つ石器群とともに、土器片と石鏃が出土していま す。土器に付着した炭化物の年代測定では、約16,500年 前のもので、現在のところ日本最古の土器です。旧石器か ら縄文時代への移行期の環境や文化様相を知る上で重要 です。

外ヶ浜町教育委員会社会教育課(TEL:0174-31-1233)

Sotogahama Town, Aomori Prefecture

Designated as a historic site in 2013

20.377.87m

This site is of the Inciplent Jomon period located on the left bank of the Kanita River. Potshards and arrowheads were discovered along with stones which bear the technique features of the Paleolithic period. Radiocarbon dating of carbonized material adhering to a potshard reveal that it is approximately 16,500 years old, which is the oldest pottery in Japan excavated so far. This site is important to study the environmental and cultural aspects of the transition from the Paleolithic to Jomon period.

V Social Education Department, Sotogahama Town Municipal Board of Education (TEL: +81-17-431-1233)

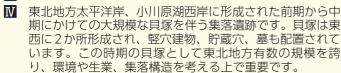

Futatsumori Shell Midden

- 青森県七戸町
- 1998年 史跡指定
- 35.551.00m²

- ▼ 七戸町教育委員会世界遺産対策室(TEL:0176-62-9702)
- Shichinohe Town, Aomori Prefecture
- Designated as a historic site in 1998
 - 35,551.00m
- This site is a settlement with a large shell midden from the Early to the Middle Jomon period. It is located on the west bank of Lake Ogawara in the northeastern region of Japan on the Pacific coast, Two shell midden were constructed: the east and the west area. Pit dwellings, storage holes, and graves were also arranged around them. Because it is one of the largest middens in the Tohoku region of Initial Jomon, it is valuable to study the environment, subsistence, and structure of the settlement at that period.

Ichinohe Town, Iwate Prefecture

Designated as a historic site in 1993

75.842.00m

This is a large-scale settlement of the second half of the Middle Jomon period located on the east bank of the Mabechi River. The settlement was constructed around the cemetary associated stone arrangements. Pit dwellings are densely packed in the eastern and western parts of the settlement, some of which have soil roofs. This site is important to provide us the specific evidences on the structure of the settlement and the pit houses in the Jomon period.

湯環状列石

Oyu Stone Circles

- 秋田県鹿角市
- 1956年 特別史跡指定
- 243.833.60m²

鹿角市教育委員会生涯学習課 (TEL: 0186-30-0294)

- Kazuno City, Akita Prefecture
- Designated as a special historic site in 1956
- This is a large monument of the first half of the Late Jomon period. It is located on the left bank of the Oyu River, which is a tributary of the Yoneshiro River. It is a représentative site of Japan to have two stone circles with a diameter of more than 45 meters. Archaeologists estimate that they had been constructed for more than 200 years. It is a significant monument to consider the ritual practice of the Jomon people.
